PROVINCE WILL CLOSE ALL CREAM BUYING DEPOTS

Edmonton, March 6.—The contentious question as to whether or not it would be advisable in the interests of the dairy industry of the province to close by legislation all cream buying stations at country points, was again brought before the agriculture committee of the legislature on Friday evening after the adjournment of the house for the week-end. The issue was debated with vigor mainly from the government members' ranks and eventually a resolution was passed declaring that "it was in the interests of the industry that such legislation should be passed."

C. P. Marker, dairy commissioner, gave statistics to show that the standard of Alberta butter had steadily declined since 1917, and something was needed to improve the grade in order to compete with New Zealand butter which 2,000,000 pounds had reached the market.

Smith, Okla., as president of the producers' association of the Alberta Dairymen's association, declared the producers were advocating the limitation of the rural cream buying stations and the shipping direct to producers to the creameries, where was proposed the government inspectors be stationed for officially grading the cream.

It was stated that the cost of \$200,000 annually was being paid for the upkeep of these cream buying stations and that of necessity had come out of the industry now. Later, however, it was pointed out that the large creameries would have to place "travellers" on the road and therefore the collection costs would still

Div. 2—C. A. Johnson.,
Div. 5—T. T. Jevne.
This report was adopted.

The matter of gopher poison for 1922 was under discussion and the required amount for the season was purchased and will be available at the office of the secretary in a few days.

Quite a lengthy discussion followed as to the method of carrying on the road work for the season of 1922, but no definite plan was made.

A. P. Moan came before the meeting to propose the amendment to the Dairymen's act, whereby the cream buying stations would be done away with. This seems to be a matter that the public, generally, have not had time to become well informed on or even partially so, hence the fol-

local stations and by inability to load cars within sufficient time would result on grading. N. S. Smith admitted that the New Zealand butter now coming into competition would fix the price for the Alberta product.

George Hoadley, minister of agriculture, stood strongly for the better development of the dairy industry and thought the many instances of having

cases, were matters for an administration to settle. Without a satisfactory market for the surplus butter of 1

cases, we matters for an administration to settle. Without a satisfactory market for the surplus butter of the province the industry would diminish to an alarming extent.

It was admitted that the main complaint with the present system of local buying is the overlapping of competition, but Mr. Marker and others declared there seemed to be no way to remedy this matter between the creameries and the companies themselves.

Secretary E. T. Love, of the Alberta Dairymen's association, addressed the meeting, generally supporting the plan of government testing of all

central cerameries instead of through local stations.

central creameries instead of through local stations.

A representative of the Swift Canadian company, however, read conclusions which claimed that the dairy industry in many places would suffer by the system of direct shipment of the creameries, by reason of cream being held longer on the farm and by the discouragement of producers in outlying districts.

The conference was for the purpose of ascertaining the feeling of the committee on the proposed alteration of the act before the bill was taken up by the committee of the house.

It was proposed to raise more funds in order to carry out the work in a satisfactory manner. It is hoped the public will realize the

What Happens to Old Railroad Ties

The railway passenger who sees piles of worn-out cross ties piled up and set on fire by repair gangs along the right of way sometimes wonders why this is done and asks why people are not allowed to use them for fuel. The Pennsylvania Railroad has issued an information pamphlet dealing with this subject.

In the first place, it is far from true that all the old ties are burned. A considerable number are constantly being sold to persons living on or near the right of way, who buy them at nominal prices, usually ten or fifteen cents apiece, and use them for firewood.

That is about as far as the railroad company has been able to go. Thus far, in finding an outlet for worn-out ties. Such a method of disposal is practicable only in those cases where the ties can be delivered at a public crossing, or other point which can be obtained safely by the user, and where the cost of no delivering them is not greater than the nominal price obtainable.

The company cannot afford to make the public good promiscuously over tracks and through yards to gather up old ties. To do so would be practically letting down the bars against trespassing on the tracks, an evil which has been the cause of about half of all the fatal accidents on railroads in the United States.

Efforts have been made to turn the old ties into lumber by buying the old ties, but not with much success. The causes appear to be that the old ties are often dirty; that they contain more or less stone, grit and slag wedged in the cracks, which might injure the saws used in cutting them; that in many cases they are partly decayed; that they are dried out, and that their fibre is more or less crushed, so that they burn out too quickly. These are among the reasons assigned by dealers who have not been willing to buy the railroad company enough to cover the cost of collecting the ties and delivering them to a point at which they could be disposed of.

Efforts have also been made to dispose of old ties in a number of other ways, including sale for wood pulp purposes, for the extraction of chemicals, for burning and sale of the ash for fertilizer, and for manufacture into charcoal, but without success in interesting parties engaged in these occupations.

The company will be glad to continue, and wherever feasible to extend, the present practice of selling old ties to individual consumers for nominal prices at points where they can be delivered without danger to the purchasers and without cost to the company for collection and transportation, more than they are worth as fuel.

The management will welcome any other suggestion by which more of old ties can be usefully disposed of or made available for commercial or industrial purposes.

The Canadian Pacific Railway goes further than the Pennsylvania Railroad and gives away ties to any who will take them, thus giving rise to the surrounding with the necessary safeguards as to trespassing. The experience of the Canadian Pacific is that ties are taken only where there is a standing timber in the vicinity, and that in many cases the farmers taking the ties do not use them for firewood but for general purposes around the farm, indicating that the value of old ties as firewood in this country is extremely small.

STARTING AERO ENGINES AT LOW TEMPERATURES

The work carried out by Professor Robb at Edmonton during this season and last can now be summarized in the form of a procedure for starting aero engines at various low temperatures.

The problem as presented to Professor Robb was that he was to assume that the engine was in an aeroplane which was forced to spend a night in the open away from the base, and it was desired to know the best method that the crew should adopt in order to start the engine the following day.

It is assumed that while the engine has been still the cooling system has been completely drained or that an efficient antifreeze mixture is available. It is also assumed that the ordinary battery has been removed from the machine and kept at room temperature and also that a supply of commercial ether at room temperature is available.

The first operation is to ease up the motor by dopping with about half a pint of gasoline and turning the engine over until it is quite free. This connection it is important to see that there is no ice in the pump before any attempt is made to turn the engine over.

The next operation is to dope the engine with about one quarter of a pint of a mixture of ether and gasoline. The mixture which is most suitable in different temperatures is given in a list below.

It is important that this initial dopping should be done liberally as this has been found that if the dopping is slightly increased the engine does not start well.

As soon as the engine starts to fire an additional one-quarter of a pint of the mixture is pumped into the intake manifold, on this should suffice for the engine to begin to fire on gasoline from the carburetor which has been flooded manually.

The motor is allowed to run for ten minutes until it is warm enough to take water at ordinary room temperatures, but care must be taken that the engine is not run too long without water.

As soon as the cooling system has been filled the engine should be started again and run for some little time so that the cooling system is functioning properly.

If the engine starts to boll in an unduly short time examination should be made for an accumulation of ice that may have stopped the system. Experiments will be carried out on the best method for handling the oiling system, but at present it is considered advisable to drain the engine immediately on finding and fill it up with oil at at least room temperature when commencing to start. It is essential that the battery should be charged to specific gravity of over 1.25, and this suggests an extra battery should be carried. (The experi-

ments were carried out on a Liberty engine). If the engine is fitted with magnetos car should be taken to see that the contact points and the distributor are clean and in good order before attempting to start.

The priming device requires to have sufficient capacity to permit quick dopping with ether mixture and the storage tank to permit the priming pump should have capacity for at least half a pint of mixture to permit two doppings.

Professor Robb used a pump constructed from a grease gun which had a bore of 1-1/8 inches and a stroke of 7 inches, and he states that a standard priming pump is too slow for this particular service.

Professor Robb experienced no difficulty with the spark plugs in his limited 100 starts, but it is considered advisable to remove the plugs from the engine and heat them over a stove before attempting to start.

The proportions of the mixture for dopping, suitable for different temperatures are as follows:

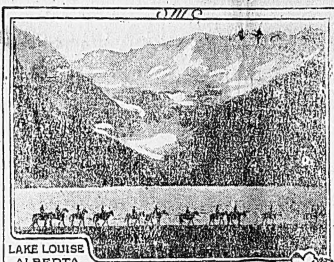

Gas	Ether
20 deg. F. and above	1 to 1
20 deg. F. to 20 deg. F.	3 to 1
15 deg. F. to 20 deg. F.	2 to 1
10 deg. F. to 15 deg. F.	1 to 1
0 deg. F. to 10 deg. F.	1 to 1

At the higher temperatures it has not been necessary to warm the battery, but a start at -37 deg. F. indicates that at this temperature ether requires to be warm, that is, at room temperature. The carburetor should be flooded in all cases before starting, and the spark should be advanced immediately the engine begins to fire. The usual position of the throttle for starting is about one-fifth open.

The ether used in these tests have been put in one pound tin marked "Mallinckrodt Motor-Start". Note: While this article deals exclusively with aero engines, the same procedure may be followed in automobile or tractor engines with excellent results.—Ed.

Canadian exports during the year ended Jan. 22, showed a decrease of more than \$480,000,000 as compared with exports for the twelve months previous, which in turn decreased by more than \$500,000,000 from the totals of the twelve months ending Jan. 1929, dollars—the Court order clears away.

The Harp in Canada

From time immemorial nature has been a source of inspiration to the poet. The majesty of the mountains, the curve beauty of the forests, the charm of rivers—all seem to have the effect of moving poetic souls. Canada, with its wealth of glorious scenery, is therefore naturally the home of poets, and indeed, it has been said that one could throw a snowball without hitting one.

The Canadian school of poetry is essentially a nature school. Bliss Carman, Charles G. D. Roberts and Archibald Lampman have set the standard, and a very high standard it is. Probably nothing in Canadian literature has been more quoted than Bliss Carman's "Low Tide on Grand Pre," a poem which breathes the spirit of nature as felt on the lovely shores of Nova Scotia.

The modern Canadian poets are following in the footsteps of these writers, but going further afield, as the facilities for travel throughout the great Dominion are extended. This is especially true in the case of H.A. Hargadon, a most volume of poems by a young Irish-Canadian poet, M. A. Hargadon, the same changes from Ireland to Nova Scotia, Quebec, and the Canadian wilderness. Here is a charming verse from a poem about Lake Louise:

"This lake is God's best picture: that is why He hung it on the mountains at the sky. And set it in so beautiful a frame: Art galleries of heaven have none as this the same."

There is no lovelier place in life And when at last I die, I think my soul will go to thine Instead of to the sky.

For here there is no sorrowing. No suffering nor care. And, up so near to paradise, I scarce could find there.

The French Canadian are described as: "Branch of a splendid race transplanted here. Blushing life through all this lovely land."

In Nova Scotia Mr. Hargadon is inspired to write lines that, as poet

MONTREAL LOST CITY HALL IN A \$10,000,000.00 FIRE

Montreal, March 4.—A total loss of at least \$10,000,000 is Mayor Martin's estimate of the net result of last night's fire at the city hall without counting the incalculable loss of historic documents, works of art and records of a municipal and sentimental rather than a financial value.

In this total, his worship includes not only the value of the building destroyed and its contents (not a dollar's worth of which is insured, his worship believes) but also the cost of replacing and recompiling lists of assessments, taxation lists etc., the furnishing of temporary accommodation and all other expense indicated upon the city by the loss of the city hall.

The disorganization of the city's finances, said Mayor Martin, was bound to be inevitable. He thought it probable that the government would facilitate the city's recovery from disaster by authorizing a special loan of two and a half or three million dollars.

SENATOR MILNE, OF HAMILTON, IS DEAD

Hamilton, March 4.—Senator John Milne, head of the Burrow, Stewart and Milne Foundry company, died this morning at 5:40 o'clock.

COURT THROWS OUT SUIT FOR COLUMBIA COMPANY RECEIVER

New York, March 4.—Receivership proceedings against the Columbia Graphophone Manufacturing Co. ended abruptly when the United States District Court at Wilmington, Delaware, entered an order denying the application made by certain shareholders for the appointment of a receiver.

In thus preemptorily dismissing the action, which at the instance of more than three shareholders—most of the twelve months ending Jan. 1929, dollars—the Court order clears away.

THE ONLY OPTION WHICH HAS BEEN DEVELOPED TO THE EXTENSIVE PLANS RECENTLY MADE TO REDUCTION THE COMPANY FINANCES AND A SOUND AND FAVORABLE BASIS.

The readjustment plans, which are under the control of a powerful committee of bankers, are being worked out to the full satisfaction of everyone concerned, and the financial world, with satisfaction the outcome, which is regarded as assuring the continuance of the Columbia's plant and business without interruption.

"The order of the court in Wilmington," said Mr. A. E. Langdon, Canadian manager of the Columbia Graphophone Co., who has been in New York for a few days, "should give a complete and final answer to the misleading reports which have been spread about in recent weeks by certain interests hostile to the Columbia Company. The Canadian Company is naturally gratified over the success of the general plan. Certain reports that the Canadian factory is not operating are entirely false. Not only is this factory in operation, but in such successful operation that it is not improbable that we will be shipping out gramophones to the United States market before the end of the month."

The Canadian plant, which is the largest of its kind in the British empire, is carrying forward without delay its plans for production of gramophones and records on the largest scale.

C.P.R. ANNOUNCE ALASKA SAILINGS

The "Princess Louise" all British Columbia built and newest addition to the coastwise passenger fleet flying the house-flag of the Canadian Pacific railway, will be ready for commission shortly.

The Princess Louise will first be operated on the route between Victoria and Vancouver, which will be in the nature of a thorough test of the ship's machinery before she is sent north to Alaska, for which service the Princess Louise was designed. The Alaska service between Victoria, Vancouver, Skagway and Prince Rupert will be maintained by the Princess Louise from the time she is put into commission for the northern run, until June next when the summer schedule of Alaska routes will go into effect. The first of the sailings under the summer schedule will be taken by the Princess Louise, leaving Victoria June 9th at 11 p.m., and clearing from Vancouver at 9 p.m. June 10th.

The Princess Louise will be operated this summer in conjunction with the Princess Althea. These two splendid boats will give the Alaskans the finest steamship service they have ever had. It will amount to approximately a semi-weekly service. The summer schedule of the Princess Louise from Victoria to Alaska is as follows: June 9th, June 22nd, July 4th, July 14th, July 25th, August 4th, August 16th and August 25th.

The schedule from Victoria of the Princess Althea which will alternate with the Princess Louise is as follows: June 10th, June 20th, July 10th, July 21st, August 1st, August 11th, August 22nd and September 1st.

Sailings from Victoria and Vancouver to the coast will be by two boats in the summer service, will be Althea, Prince Rupert, Ketchikan, Wrangell, Juneau and Skagway, these calls being made on both the north-bound and south-bound trips.

THE BAR COULD OF TODAY MAY DEVELOP INTO PNEUMONIA TOMORROW

Next to consumption there are more deaths from pneumonia than from any other single cause.

Pneumonia is nothing, more or less, than a cold, or as it is called, "inflammation or congestion of the lungs."

The accompanying pneumonia is at first frequent and hacking, and the expectoration is a greenish yellow, which soon, however, becomes more copious and of a more solid color; the lungs become congested, the bronchial tubes inflamed with phlegm, making it hard for the sufferer to breathe.

On the 24th of a cold or cough you should get a bottle of Dr. Wood's Great Peppermint Cure, and thus prevent the cold developing into some serious lung trouble.

Mr. J. C. Crouch, Elmiston, Ont., writes: "Five years ago I got pneumonia and almost died. I fought against it and no matter what I did I could not get myself off. In November I was going some distance, because my chest felt me up so."

My doctor wrote me from Ottawa, and told me to get a bottle of Dr. Wood's Great Peppermint Cure, so I got one, and before Xmas my chest was completely gone."

DR. WOOD'S
GREAT PEPPERMINT CURE
STYRE
Price 50c and 60c per bottle; put up only by Dr. T. M. M. M. Co., Limited, (Toronto, Ont.)

WILL DISCUSS GRADE FOR HIGHWAY WITHIN THE NEXT 30 DAYS

Ottawa, March 6.—The federal department of railways and canals expects to be ready within thirty days to discuss with the Alberta government or other interested parties the final disposition of the abandoned Grand Trunk Pacific grade between Estevan and Jasper.

Discussion of this matter so closely related to the proposed Jasper Park highway has been delayed pending a settlement between the Dominion and the British government on accounts arising out of the tearing up of steel on this and other sections of the G.T.P. for use in France during the war.

The Canadian plan has been to acquire the three hundred miles of rights and duplicate tracks torn up east of Winnipeg, and as regards the labor, freight and bridge items on the Estevan-Jasper section. Negotiations regarding the only remaining point, that of damages for the abandonment of the road are now under way and are likely to be concluded within the next two or three weeks.

COMPLETELY FREE OF CONSTIPATION

Tried for Years to Find Relief

"FRUIT-A-TIVES" GAVE IT

Chronic Constipation or insufficient action of the bowels, is one of the great causes of disease. Some authorities even claim that Constipation cannot be permanently corrected. This is a great mistake, because here is the proof that constipation can be cured and the bowels made to act regularly and naturally.

Yanmoort, N.S.
"For years, I was troubled with Constipation, and had to take laxatives and purgatives all the time. If I neglected to take these, the bowels would refuse to do their work."

About two years ago, a friend advised me to try "Fruit-a-tives", which I did. The first box helped me so much that I obtained further supplies of the remedy and continued the treatment. After using about eight boxes, my bowels were able to perform their particular function without aid.

The relief in my case has been lasting, as up to date, I have never had any further trouble. I can recommend "Fruit-a-tives" as all suffering as I did and I am sure they will derive equal benefit."

A. W. FRANKLIN.

"Fruit-a-tives" are sold by all dealers at 50c a box, 6 for \$2.50, trial size 25c, or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Heater; 2 Beds; Springs and Mattresses; Tables, Chairs, Dishes, pots and pans, and other articles too numerous to mention.

POTATOES—About 200 bushels of good potatoes.

POULTRY—Two Dozen Chickens.

BUILDINGS—Barn, 16 x 26. Frame House, 4 rooms, 12x14, with all right roof. Small barn, 12x12. The above buildings will be offered for sale on bloc; if not sold on bloc, then each building will be sold separately to the highest bidder. The person buying the house will be given a Clear Deed to the lot.

D. & A. Practical Eront Corset

Dech
PATENTED
POINT

The newly patented corset, which really gives a perfect straight front and a small hip effect. A corset which permits perfect and quick adjustment to the figure at each wearing. The inner front section of high grade elastic holds itself to the body and automatically forces the wearer to put the corset on properly. This elastic section clasps together with a very pliable light weight corset clasp, the outer section lacing together, the lacing being directly in the middle of the body. The time required to put on this corset is but the matter of a few seconds, and the effect produced together with the wonderful comfort of the wearer is remarkable. Priced at\$6.50 to \$7.50

Goddess Front Laced Corset

See the new models with the aero back. These corsets are well known for their superior wearing and splendid fitting qualities. We have a complete range of new corsets to suit the most fastidious customer. Priced at\$3.50 to \$7.50

SPECIAL PURCHASE OF D. & A. CORSETS

We have two very special lines in the well known D. & A. Corsets, which we are making a special lead off. Priced at\$1.45 and \$1.95

MILLINERY OPENING

Ladies will do well to visit the Millinery Department on Saturday, March 11th, when all the latest models in Spring Millinery will be on display.

New Spring Suits

Ladies will find here some of the smartest styles in New Spring Suits, beautifully trimmed, in Serge and Tricotine. They are priced from\$25.00 to \$65.00

Fashion has found New Ways to make the Spring Coat Smart

First of all she has used new materials and employed favored trimmings in new forms. She has made a feature of new collars and sleeves, and a study of long slender lines and the arrangement of belts, making the coat one of the most practical garments in a woman's Spring wardrobe for the changeable days of Spring. Come in and see them. Priced from\$25.00 to \$45.00

Fine All Wool Cashmere HOSIERY In New Heather Mixtures

"Mercury" fine wool hose in plain and ribbed effects, widened garter top, full fashioned spliced heels and toes. Sizes 8 1/2 to 10. Specially priced at\$1.50

SYSTEM RUN DOWN
HEADACHES AND DIZZY SPELLS
ALSO CONSTIPATION

Mrs. Ernest P. Trimmer, Waldeck Line, N.S., writes:—"My system was greatly run down, my head would pain so I could not see, by spells, and I was so dizzy, at times, I would have to lie right down. I was also terribly troubled with constipation.

I got a vial of Milburn's Lax-Liver Pills, and haven't had any trouble since. I feel that anyone who suffers like I did can get relief by using your pills."

are, without a doubt, the best liver regulator on the market to-day. Over a quarter of a century's popularity proves this.

Price, 25c. a vial at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"BOB" EDWARDS, M.P.P.**"The Eye-Opener" Editor is Now a Western Law-Maker**

(By Ernest Clay Porter)

It is "Mr. Robert Chambers" Edwards, M.P.P. for Calgary, now but in those days he wrote it. "Bob" just "Bob" Edwards. Representing Calgary at the Canadian parliaments as a writer and practical joker to his credit. Bob Edwards has probably written more jokes about noted people than any man west of the lakes and not infrequently has he contributed punch to his stories by helping stage the funny stuff on his victims. And they were the days when these things were appreciated. There was little amusement the people were too busy doing big things in a big way, putting the prairie on the map.

A companion part was being played as a fun maker by Dr. R. G. Brett, who had just completed his services as general surgeon in charge of construction west of the lakes. He is now serving his second term as Alberta's lieutenant governor but the title of "His Honor" sheds no special laurels on a name whose bearer endeared it to thousands of men and women in the pioneer days by skillful medical services rendered cheerfully with little thought of pecuniary reward. The old west accepted Brett's appointment as a tribute to itself and the spirit of it represented in cementing empire's reaches and no more gracious representative of his Majesty can be found.

But in those days Dr. Brett was busy trying to make the world understand what the National Park of which Banff is the capital really signified. He was not too busy however to overlook a chance to have his joke. And especially was Brett not "passing up" anything when it came to "getting even" with "Bob" and other newspaper men who never lost an opportunity to put one over on him.

"Bob" and the writer were outfitting at Banff for a fishing trip to Castle Mountain. Brett interested in every detail. Finally the doctor remarked "now boys, when you are ready to start, drive by and see me. I want to make you a little present."

"Just like the doc," rejoined Edwards, "never forgets his friends. Betcher he has a case or two of champagne for us—yes, perhaps three or four; bully old doc, yeah, I tell you Hank, Brett's the boy, can't beat him." We speculated for an hour on the vintage of the wine and were radiant with hopes and fears as we drove up to Brett's place. Sure enough the doctor came to the door, invited us in with a warm and smiling of his and an unctuous handshake that made him famous. There was a twinkle in his eye—"I ought to have warned me but it didn't. Then he invited us way back where we knew he kept stuff in bottles. 'Yes, we were right,' Bob whispered, 'you carry one case and I'll struggle through with the other.'"

Then the doctor reached up on the shelf with great deliberation and took down two little phials. They had probably only an ounce. Turning around with a serious expression, he remarked, without suggestion of mirth "Now newspaper boys have been pretty good to me and I want you to know that I appreciate it and I want to show my appreciation substantially—substantially. In these two phials is the very best quality of ammonia. There will be a cloud of mosquitoes on Castle Mountain. You will be bit frequently. Every time you get a bite remove the cork from these bottles and put a little on the bite. Repeat this every ten minutes for ten hours and there will be no inflammation. Well, so long, fellows," and the doctor turned away still reflecting nothing but the most serious professional interest in his two patients. We departed full of gloom for we knew that the doc had put one over.

That fall Bob Edwards was publishing the paper that was later to earn him fame at Wetaskiwin. He was rapidly acquiring a reputation for practical jokes. Jerry Doyce had an hotel there that was the abiding place of all the practical jokers in northern Alberta. Bob's bomb shells had rocked it frequently. "Get one on Edwards!" was the constant thought of the crowd. Edwards occupied a room across the street from the Doyce hotel, in the second story of a building which had once been a hotel but was then the abode of a few teachers, kindred spirits with whom locked doors were taboo.

The night before had been rather strenuous for Edwards and some of his bachelor friends and they retired late. There was no sign of life around their quarters when the morning train arrived, and unlatched an Italian with a portmanteau. When Jerry Doyce saw that big animal, he stopped, hesitated, grinned, and began to laugh. He whispered to Tom Burns and Tom began to laugh. Then Tom and Jerry began to whisper to the Italian. The son of Italy shook his head vigorously. He was apparently

MAGIC
BAKING
POWDER

Magic Baking Powder is scientifically made and has never failed to give the maximum leavening efficiency. Because of this and the uniformly satisfactory results obtained by its use we recommend it as Canada's perfect baking powder.

PRODUCT

ly frightened by the drift of the negotiations. Jerry displayed a dollar and called him over and gave him a drink. Then he nodded and grinned.

Jerry and Tom herded the Italian and his bear over to the bachelor quarters, took them up on the second floor and pointed to Bob's room. The door was open. Bruin was pushed inside and the door closed softly. Then Jerry and Tom walked across the street where they could command a view of the only window in Bob's room and sat down. They were joined by others to whom they whispered. Then they waited. Ten minutes later they observed a commotion in the room. Shadows seemed to hurry first one way and then another by the window. They became more violent. The end of the building shook as if in a storm. Suddenly Bob came through the window carrying glass and sash behind him, hit the ground, bounced up like a rubber ball and made a lunge rush for Jerry's bathroom. He was in his night clothes and moving so fast he did not notice the spectators on the side lines.

He took two pretty good snorts before he stopped, then walked over and looked out the door at the window through which he had made his exit. A big bear's head protruded through the window carrying glass and sash behind him, hit the ground, bounced up like a rubber ball and made a lunge rush for Jerry's bathroom. He was in his night clothes and moving so fast he did not notice the spectators on the side lines.

"Here you, take a look and tell me what that is with its snout sticking out of my window up there." He completed, "It's a bear." "Ha!" snorted Bob, "that alright, that alright."

**SOAKING GRAIN IS**
AHEAD OF BOILING**IMPORTANT FEED ELEMENTS DESTROYED BY BOILING ARE REQUIRED BY ANIMALS**

(By W. F. Stevens)

The question of why soak ground grain in hot water, as suggested in an issue of the Market Examiner, when practically all the authorities agree that cooking grain for pigs is not profitable, is a fair question, and on the surface appears to direct attention to a suggestion that is out of harmony with the teachings of barnyard authorities.

The contradiction, however, is more apparent than real. This is due to the difference in the effects of boiling and soaking on the vitamins that are abundant in grains, grasses, fruits and vegetables. They are elements of these foods which were unknown until recent years. Much still remains to be learned about them, but this much has been determined:

Animals which are confined to a diet from which they are absent soon sicken and die, while the addition of substances which are known to be rich in vitamins—such as yeast—to the same ration, preserves the animals to which it is fed in vigorous health.

Another important fact is that at a temperature of 200 degrees Fahrenheit the vitamins lose their strength, and a temperature maintained for any length of time at 212 degrees they are destroyed. From this it is clear that cooked feed is deficient in vitamins, whereas when boiling water is poured over ground grain, the cold grain reduces the temperature of the water to a point below where it will be injurious to the vitamins. At the same time the water remains sufficiently warm to expand and burst their rather tough covering, and to change the starch itself into a substance resembling the nature of sugar.

This preparatory change is not necessary for a half-grown or mature animal, but it is of great value in the case of one just taken from the mother's milk.

The importance of food well supplied with vitamins is illustrated in the case of men who are working in the cold and are subsisting almost wholly on salt and canned meats, dried beef, stock, boiled potatoes and boiled pork and beans, and the like. In the preparation of these the vitamins have been destroyed. In a short time the men develop a craving for apples, celery, lettuce, raw cabbage and such substances are known to be rich in vitamins. If these are denied, scurvy or neuritis develops. If they are supplied the men return to normal health.

To sum the matter up briefly, soaking grain in hot water is to be preferred to boiling, because the vitamins have not been destroyed. It is superior to soaking in cold water because of the partial transformation

right, was just afraid I was mistaken, come on, drinks on me, what."—Toronto Saturday Night.

of starch into sugar, thus making the food more digestible to young animals, and it is to be preferred to feeding dry for the same reason, and for the further reason that the oat hulls in oat chop and the finely ground rubbish found in much of the commercial shorts on the market of late years are softened and rendered less irritating to the tender lining of the stomachs of young pigs.

RYLEY SUFFERS
MORNING BLAZE
WITH A BIG LOSS

Fire practically destroyed the entire business section of Ryley, situated east of Edmonton on the Grand Trunk Railway Saturday morning, the cause, presumably, being the igni-

tion of matches, which had been chewed by mice in a general store.

The fire is supposed to have had its origin in the general store of Hall & Horgan, which building was completely destroyed, also the residence of L. the Grand Trunk line. The loss is estimated at \$50,000.00.

MILLET

On Monday last a very enjoyable evening was spent at the home of Mr. and Mrs. R. P. Roon, when a surprise party was given in honor of their wedding anniversary. Mrs. G. A. Wagner presented the gift, a silver bread tray, which was graciously accepted by Mrs. R. P. Roon. Among those present were Mr. and Mrs. H. Phillips, Miss I. Phillips, Mr. and Mrs. Von Arx, Mr. and Mrs. W. R. P. Roon, Mr. and Mrs. A. B. Dowdell, Mrs. J. Dowdell, Miss B. Dowdell, Mr. and Mrs. Hopping, Mr. and Mrs. Islop, Mr. and Mrs. G. A. Wagner, Mr. T. Rogers, Mr. Littman, Mr. W. Aeschelwiler, Mr. C. Dowdell.

The raffle for the quilt for the Catholic church was won by J. Moen.

The following is the statement of the committee who had the dance in hand for raising money for the parties who lost all at the recent Millet fair. Subscribed: \$21.00
Proceeds of Dance 64.35

Total \$85.35
Paid hire of hall \$10.00
Supplies and Clothing 49.10
Millet Mercantile 25.60
Plates for supper 1.00

Total \$85.35

The committee wish to thank every one who helped the evening of the dance to make the affair a success, also the ladies who so generously provided for the supper.

The board of trade held a protest meeting on Saturday night against the government for taking the cream stations from Millet. After a long discussion it was decided that a telegram should be sent to the Hon. Geo. Hoadley, and also one to S. G. Tobin, the member for Leduc, asking them both to use their influence in helping to keep the cream stations at Millet.

Party-time young people of Millet turned out on Friday night and gave the Moon boys a great surprise party. Quite a number are on the sick list this week. Mr. Leonard Gray's family are the greatest sufferers. We hope all will soon be feeling fine and well again.

Mrs. C. A. Kent and Irene went to the Capital Monday, where Mrs. Kent is taking medical treatment.

We are glad to know that Mrs. Walter Woods has returned from the city feeling much improved in health. Best estate is already beginning to move around here. And another of our highly respected families are about to depart from the Larch Tree neighborhood. Mr. Alex. McConnell has sold his farm to Mr. Humphreys, who has again returned to Millet to resume agricultural pursuits near his original farmstead.

The entire community will greatly regret the departure of Mr. and Mrs. McConnell as they have taken a most active part in social and church life. Their many friends wish them the best of success wherever they may take up their new home. Poor health has obliged Mr. McConnell to give up active farming operations. Again, we sincerely hope that the change will prove the means of improving his health.

The choir will meet at the home of Mr. A. J. Heywood for practice. Let every member endeavor to be present. The choir is ordering new costumes, which will be greatly appreciated. Remember the Bean Supper on the 17th of March. An Irish concert will

BUSINESS LOCALS

be rendered following the supper, in Playon's hall. Please reserve this date.

A surprise party was held at the residence of Mr. and Mrs. Herman Arnold, on Friday evening last, in honor of Mr. Arnold's success at the recent municipal elections. The house was full to overflowing with guests. The Weissenfels Brass Band and the Barnes' orchestra were in attendance. Miss Irene Phillips a talented pianist who is home for a short visit from Edmonton, rendered several selections, and lunch was afterwards served by Mr. and Mrs. Arnold. Three "hip, hip, hurrahs," shouted for Mr. Arnold after which the crowd departed wishing their host the best of success during his administration.

The services on Sunday will be at—

Larch Tree 11:30 a.m.; Hillsdale, 2:30 p.m.; Millet church, 7:30 p.m.; Sunday school at 11:00 a.m.

Cord of Thanks

We wish to gratefully acknowledge through The Times the great kindness shown to us in our recent bereavement in the demise of our beloved son Earl, also for the many flowers presented by the church and friends.

Mr. and Mrs. Harry Moffatt

An event of importance is slated for March 17th, when an Automobile dance will be given in the Angus hall.
